DATES OF RESPONSE

5/10/2004 – 7/18/04

INCIDENT DESCRIPTION

Region 8 EPA OSC requested PST personnel to assist in site safety, contractor monitoring and air sampling on an asbestos removal site involving three adjoined properties. A processing plant once located on these properties processed vermiculite which contained Libby Amphibole asbestos. The vermiculite was then used in the manufacturing of various building materials. Libby Amphibole is considered one of the most dangers forms of asbestos.

RESPONSE ACTIVITIES

PST personnel assisted EPA region 8 OSC's with daily activities including site safety, contractor monitoring, reviewing contractor cost documentation and air sampling. PST personnel conducted level "C" entries with contractors for inspections and to assist in obtaining clearance air samples.

LESSONS LEARNED

- 1) Unit needs to buy HEPA filters for APR's
- 2) Be flexible with working around contractors schedules
